## **DETAILED ACTION**

### ***Receipt Acknowledgement***

1. Receipt is acknowledged of the Amendment filed on 1<sup>st</sup> of March 2005. Claims 1 has been amended; no claim has been canceled; and no claim has been newly added since the RCE(2) Non-Final Office Action was mailed on 1<sup>st</sup> of October 2004. Currently, claims 1-7 are pending in this application.

### ***Allowable Subject Matter***

2. Claims 1-7 are allowed.

3. The following is an Examiner's statement of reasons for allowance:

Applicant's claimed invention is deemed allowable over the prior art of record as the prior art fails to teach or suggest that a return-address-setter that sets return-address data in the program counter to coincide with the comparison address data when execution of the interruption-process in accordance with the revisional program is completed, and an address-coincidence-disabler that disables the coincidence between the comparison address data and the return-address set in the program counter by said return-address-setter in response to a control flag that is set in the revisional program.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Drawings***

4. The application having been allowed, formal drawings are required in response to this Office Action including changes required by the proposed drawing correction filed on 8<sup>th</sup> of September 2003, which had been approved by the Examiner.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Miyazawa et al. [US 5,357,627 A] disclose microcomputer having a program correction function.

Lee [US 4,610,000] discloses ROM/RAM/ROM patch memory circuit.
